February FY15

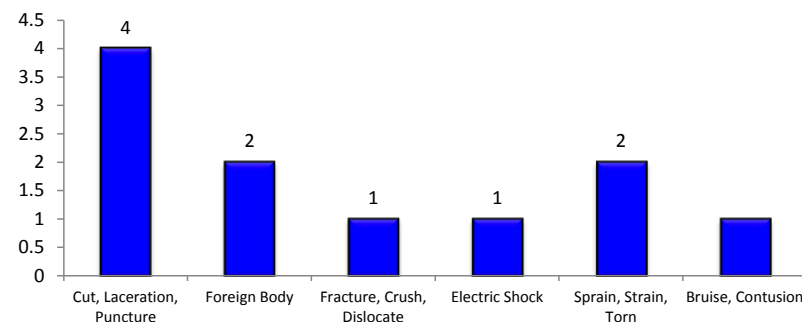

Prepared by: R Spencer

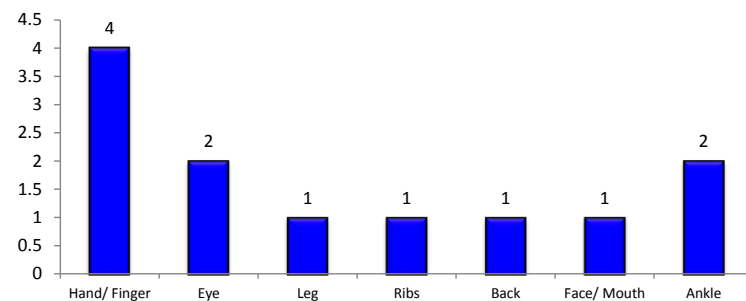

DOI	Plant	Job / Occupation	Type Injury	POB	Incident Narrative	Event of Exposure	Company
10/22/14	BRF	Pipefitter	Fracture, Crush, Dislocate	Ribs	An employee missed stepped and struck their rib cage.	Struck Against Object	GUBMK
11/24/14	WTH	Ironworker	Foreign Body	Eye	grinding stainless steel plate	Foreign Body	GUMBK
10/13/14	GAF	Boilermaker	Foreign Body	Eye	URS Boilermaker was preparing to grind/smooth out lip and clear debris from wall in U3 Economizer. Employee's partner had already began grinding before employee could lower faceshield. Employee believes that during this time period a foreign body from partner's grinding operations entered left eye.	Foreign Body	URS
10/28/14	GAF	Pipefitter	Cut, Laceration, Puncture	Leg	Pipefitters were moving a 20 ft. section of schedule 40 pipe into the plant on rolling pipe stands. Wheels on the back pipe stand locked up causing it to shift out from under the pipe. The edge of the pipe stand contacted the workers' shin	Struck-By	URS
10/9/14	BFN	Pipefitter	Electric Shock	Hand/ Finger	Employee was replacing snubbers in the reactor building, started to pick up the snubber and received an electrical shock	Electric Shock	NPS
10/11/14	BFN	Pipefitter	Cut, Laceration, Puncture	Hand/ Finger	Employee was working in the 1B HP heater room cutting a piece of 2 inch pipe and cut the left top index finger with a cut off wheel when it kicked back on him	Struck by Object	NPS
12/6/14	WBC	Capenter	Bruise, Contusion	Hand/ Finger	Employee was attempting to reposition a vertical scaffold tube in preparation for removal by applying upward pressure on the base. Hand slipped resulting in injury	Struck Against Object	Williams
12/30/2014	GAF	Sheet Metal Worker	Sprain, Strain, Torn	Back	A Brand sheet metal worker was using a scaffold brace to pry on a scaffold in order to gain room to install lagging between the A & B Hopper at Unit 4. As he was prying on the scaffold he felt pain in his back & abdomen. He was observed at the Enerfab first aid office. During this observation he stated that the pain he felt had subsided.	Body Movement	Enerfab/Brand
1/11/2015	WBN 2	Instrument/Pipefitter	Cut, Laceration, Puncture	Hand/ Finger	Employee was descending the permanent plant ladder in the room to get his work package which was on a temporary scaffold below. As he went to retrieve the binder, his foot slipped off the ladder rung causing him to lose balance and he fell approximately 5 feet to the floor. Injured worker was wearing all required PPE (Sturdy leather work boots).	Slip/Trip/Fall	Bechtel
1/10/15	GAF	Electrician	Cut, Laceration, Puncture	Face/ Mouth	Tonight at approximately 1230 AM an Electrician was climbing down a scaffold ladder on the West side of an outer wall at Unit #3. As he was climbing down his retractable type lanyard hook got hung up on a piece of the scaffold that was behind him. He had gone down a couple of rungs before he felt the lanyard being hung up. As he stopped and looked up to see where it was hung the hook came free and fell, coming into contact with the bridge of his nose causing a gash.	Struck-By	Alstom/Enerfab Elect
1/29/15	GAF	Boilermaker	Sprain, Strain, Torn	Ankle	At approximately 7:40AM, a boilermaker was spotting an aerial lift while the operator was backing to the east on the east side of Unit 4. While spotting the boilermaker was standing on the top lid of the fire protection structure at this location. As he stepped down off of the south side of the structure he rolled his ankle & fell to the ground. The boilermaker was taken to the URS first aid office for observation / treatment. First Aid treatment was provided at that time. Due to the amount of swelling & to rule out any potential broken bones in the ankle / foot an appointment was made at the local clinic. During the visit to the clinic medical treatment was provided for the sprained left ankle that the boilermaker sustained.	Slip/Trip/Fall	Enerfab
2/11/15	SQN	Laborer	Fracture	Ankle	Load shifted in wheel barrow and EE lost control of wheel barrow and balance.	Slip/Trip/Fall	NPS
